### **DETAILED ACTION**

Claims 1-15 and 17-19 are pending in the instant application.

#### ***Specification***

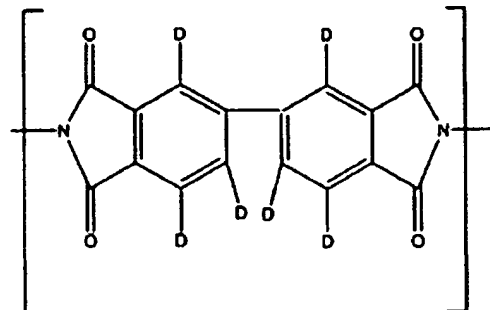

The substitute specification filed August 29, 2005 has not been entered because it does not conform to 37 CFR 1.125(b) and (c) because: a marked up copy of the specification has not been received.

#### ***Election/Restrictions***

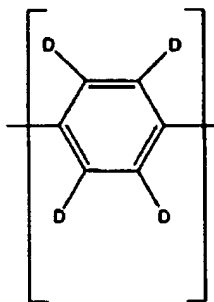

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1. Due to the numerous variables in the claims, e.g. Y, Z, A<sup>1</sup>, etc... and their widely divergent meanings, a precise listing of inventive groups cannot be made. The following groups based on compounds presented in the disclosure are exemplary:

Art Unit: 1626

Group I, claim(s) 1-4 (in part) and 17-18 (in part), drawn to a deuterated

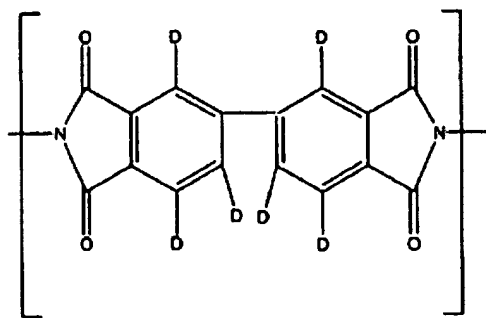

polyimide which comprises an alteration between:

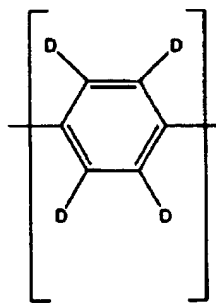

and

Group II, claim(s) 1 (in part) and 5-6 (in part), drawn to a deuterated polyimide

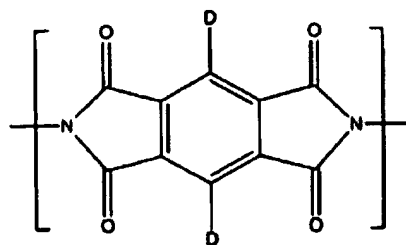

which comprises an alteration between:

and

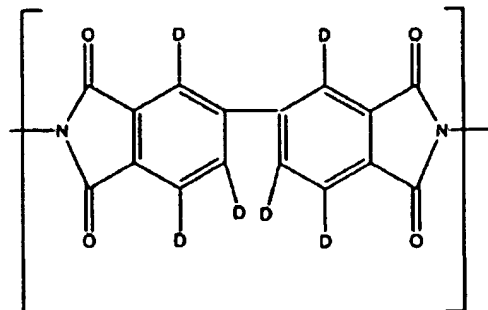

and additionally comprising

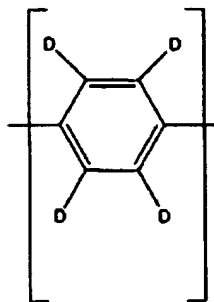

Art Unit: 1626

Group III, claim(s) 7-10(in part), drawn to a method of making a deuterated

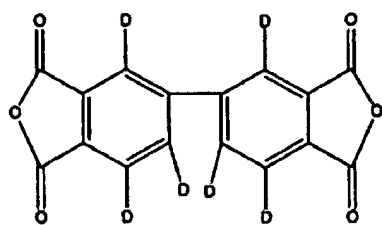

polyimide which comprises an alteration between:

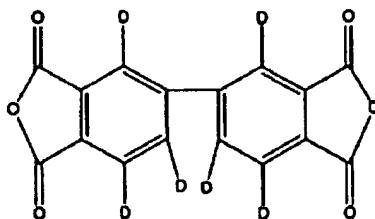

and

Group IV, claim(s) 11-12 (in part), drawn to a deuterated dianhydride monomer of

the formula

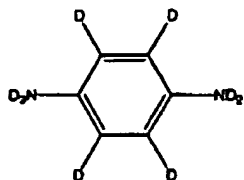

Group V, claim(s) 13 (in part), drawn to a method of making a deuterated

dianhydride monomer of the formula

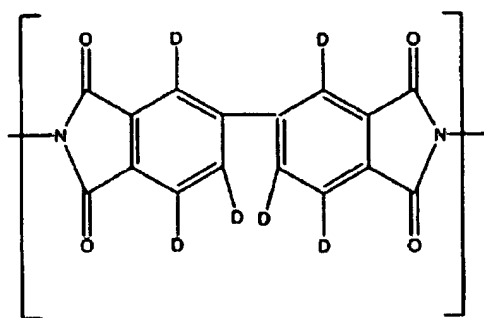

Art Unit: 1626

Group VI, claim(s) 14 (in part), drawn to a method of making a deuterated

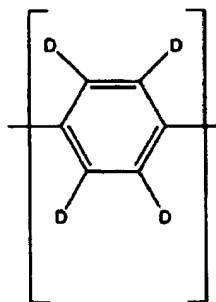

diamine monomer of the formula

Group VII, claim(s) 15 (in part), drawn to a film based on a deuterated polyimide

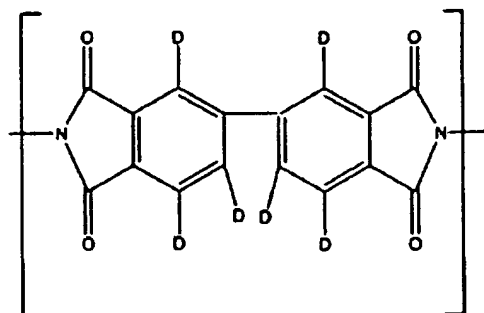

which comprises an alteration between:

and

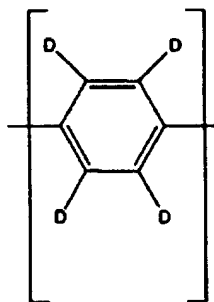

Art Unit: 1626

Group VIII, claim(s) 19 (in part), drawn to a material comprising a deuterated

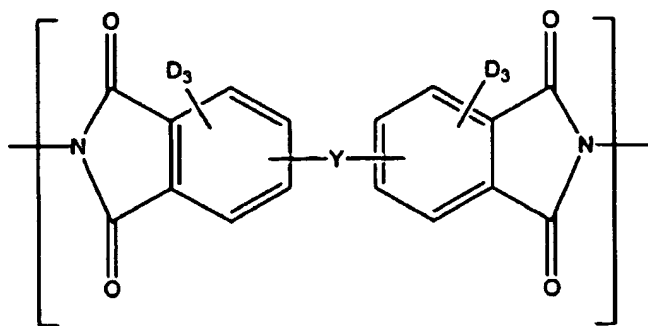

polyimide which comprises an alteration between:

and

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, **this list is not exhausted**, as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, Applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and Examiner will endeavor to group the same. **If Applicant is unable to elect a single invention, Applicant may instead choose to elect a specific compound and Examiner will attempt to group it.** The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain a

Formula I:

. Since the core substituent, Y, can have different meanings, there is no discernable special technical feature of the inventions as a whole. Therefore, unity of invention is lacking.

Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter. The method of preparation claims will be examined with the elected invention commensurate in scope therewith.

A telephone call was made to Mary B. Grant on June 27, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
